

## Technical Process Data Sheet

# LD-LEATHER CLEANER INTENSIV PURE - That's how it's done: -

### Cleaning:

Dip the special sponge in water. Remove the sponge damp (no not wring) und apply LD-LEATHER CLEANER PURE INTENSIVE (sparingly) on to the sponge. Then press, until foam is created. Shampoo the leather with sponge and foam thoroughly. Do not worry, the leather can tolerate the moisture! Work more intensely on stained areas; less intensely on clean areas. Always wash the entire piece of leather - not only the stained areas. Through new, leather-friendly active ingredients a deep cleansing is achieved (surface dirt). Simply rinse dirty sponge in soapy water. Soiled sponge simply rinse in soapy water.

Do not polish! The foam does not need to be completely removed – portions of the foam may remain on the surface. The coconut/lanolin regreasing process now starts! The specific nutrients and care products will penetrate the leather completely (no sticking).

### Treatment:

Smoothen the wet leather and leave to dry slowly. The drying time can take up to 2-3 hours. Thoroughly rub/massage the completely dry leather (with a cotton cloth or similar). For wild/suede leather types: brush after complete drying.

### Impregnation/care:

In addition to the LD-LEATHER CLEANER INTENSIV PURE (leather cleaner) a LD-LEATHER CARE + IMPREGNATE (leather care) is offered. Apply LD-LEATHER CARE + IMPREGNATE after the complete drying of the leather onto the leather with a fine-pore sponge. The leather care intensifies and refreshes colours. Leather treated with LD-LEATHER CARE + IMPREGNATE is automatically protected from weather, yet characterized by outstanding breathability.

### Suitability:

LD-LEATHER CLEANER INTENSIV PURE is suitable for any kind of smooth and grained types of leather with closed pores, as well as suede leather, nubuck, etc.

Usable e.g. at:

- leather seat covers
- leather arm caps
- all leather products in aircraft

LD leather care products are also suitable for plastics, simulates and natural woods.

Good luck! Your LACKDESIGN-Team.
